Effect of closing an account - If you close your account before interest is credited, you will not receive the accrued interest.

Average daily balance computation method - Interest is calculated by the average daily balance method which applies a periodic rate to the average daily balance in the account for the period. The average daily balance is calculated by adding the balance in the account for each day of the period and dividing that figure by the number of days in the period. The period we use to make this calculation is monthly.

Minimum balance to obtain the disclosed annual percentage yield - You must maintain a minimum average daily balance of \$2,500.00 in your account to obtain the disclosed annual percentage yield. The average daily balance is calculated by adding the balance in the account for each day of the period and dividing that figure by the number of days in the period. The period we use to make this calculation is monthly.
